Jason,

I think the cartridges were eluted into 15 mL Falcon tubes and only a portion of that primary extract was mixed into an LC vial. We're looking for those Falcon tubes.

The compounds that could be present appear on slide 11 of our PowerPoint. We're really looking for anything with F that could be present – we don't know what might be there.

Anyway, Mark and James reran some of the extracts from your second round of sampling from July, 2016 using the TOF. I think the water levels were very high at that time, but we're focusing in on the samples that still had PFOA higher than 1000 ng/L.

The last round of sampling from December had lower water and pretty high PFAS. That's why we're looking for those extracts.

Thank you very much,

Andy

Hi guys,

The cartridges were thrown away, but I don't know what happened to the LC vials. Sorry.

Just out of curiosity, do you have certain compounds in mind?

- Jason

Jason,

Thank you for your careful proofreading – I will make your changes.

Do you know where the extracts from your last round of sampling are (December 2016)?

Mark is trying to look for evidence of other PFAS besides GenX in these samples (using the TOF) and he can't find the extracts. He found the soils, but not the extracts.

Please let us know.

Thank you very much,

Andy

Hi Andy,

What you put together was exactly what I had in mind. I have no content changes, but did notice a few formatting issues.

- 1) Slide #2, Overview, has different spacing at the beginning of the first two bullet points.
- 2) Slide #20, Extended Sampling Results, has a different format for the title.
- 3) Slide #22, Questions, you can just list my email as galloway.18@osu.edu - and it may be good to crop the picture on the right.

I'm back from vacation, so I could make these changes - along with some other formatting-only changes (aligning text, making bullet points and font sizes consistent, etc.). Would that be OK?

Thanks,
Jason

Subject: Draft PowerPoint

Jason,

Here's a draft copy of our PowerPoint presentation. Please let me know what you think.

If you would like to change things in your part of the presentation, please let me know as soon as you can so I can get it through the review process before the conference.

Small changes shouldn't be a problem - I can make these after we get clearance.

I am sure that people at the conference will be very curious about your measurement of GenX in the Parkersburg area. The KeepYourPromises folks especially.

Thank you very much,

Andy
